Naomi Reyes

Environmental Chemist / Northfield University

Bristol, United Kingdom / naomi.reyes@northfield.ac.uk
orcid.org/0000-0000-0000-0000 / github.com/naomireyes

PROFILE

Environmental chemist working between the field and the bench. Research follows carbon, nutrients and contaminants from hillslope and road surface to riverbed, reservoir and coastal mudflat, and tests whether models agree with what the samples say.

APPOINTMENTS

2023- Lecturer in Environmental Chemistry, Northfield University
2020-2023 Postdoctoral Research Associate, University of Bristol
2016 - 2020 PhD Environmental Chemistry, University of Bristol

EDUCATION

2016-2020 PhD, Environmental Chemistry, University of Bristol
Thesis: Drought legacies and dissolved organic carbon export from upland catchments.
Supervisor: Prof. Alan Whitfield.
2012-2016 MEnvSci, Environmental Science, University of Leeds (First Class)
Dissertation: Metal partitioning in urban road sediments.

RESEARCH INTERESTS

Catchment carbon and nutrient export; contaminant fate in urban sediments; calibration and drift in low-cost sensor networks; open methods and reproducible field data.

SELECTED PUBLICATIONS

TEACHING

2024-	Environmental Analytical Chemistry (MSc), Northfield University
2023-	Field Methods for Catchment Science (BSc), Northfield University
2022-	Data Skills for Environmental Scientists, annual workshop

SERVICE AND SKILLS

Reviewer for Biogeochemistry, Water Research and Environmental Pollution. Departmental lead for research data management. Field sampling and porewater extraction; ion chromatography; DOC and nutrient analysis; sensor calibration; R and Python.
